HURRICANE PREPAREDNESS & EVACUATION INFORMATION

HURRICANES

Hurricanes can cause catastrophic damage to coastlines and several hundred miles inland. Hurricanes and tropical storms also spawn tornadoes, create storm surges along the coast, and cause power and utility outages.

When a hurricane warning is issued by the National Weather Service and the coastal area is threatened, you should:

- Monitor your local TV and radio stations.
- Fuel your vehicles and generators.
- Check your disaster supply kit.
- Cover windows with plywood.
- Bring in all furniture, toys and any other objects that could become missiles.
- Moor boats to a safe and secure place.
- Take pictures of property and contents for insurance purposes.
- Evacuate immediately, if advised.

If you stay in your home during the hurricane and are not in a flood prone area:

- Fill bathtubs and all available containers with water.
- Turn off utilities, if requested.
- Remain indoors in a closet, bathroom or hallway on the lower level of your house, away from windows.
- Cover yourself and family members with a mattress or a dining room table to protect yourself from falling debris.

EVACUATION

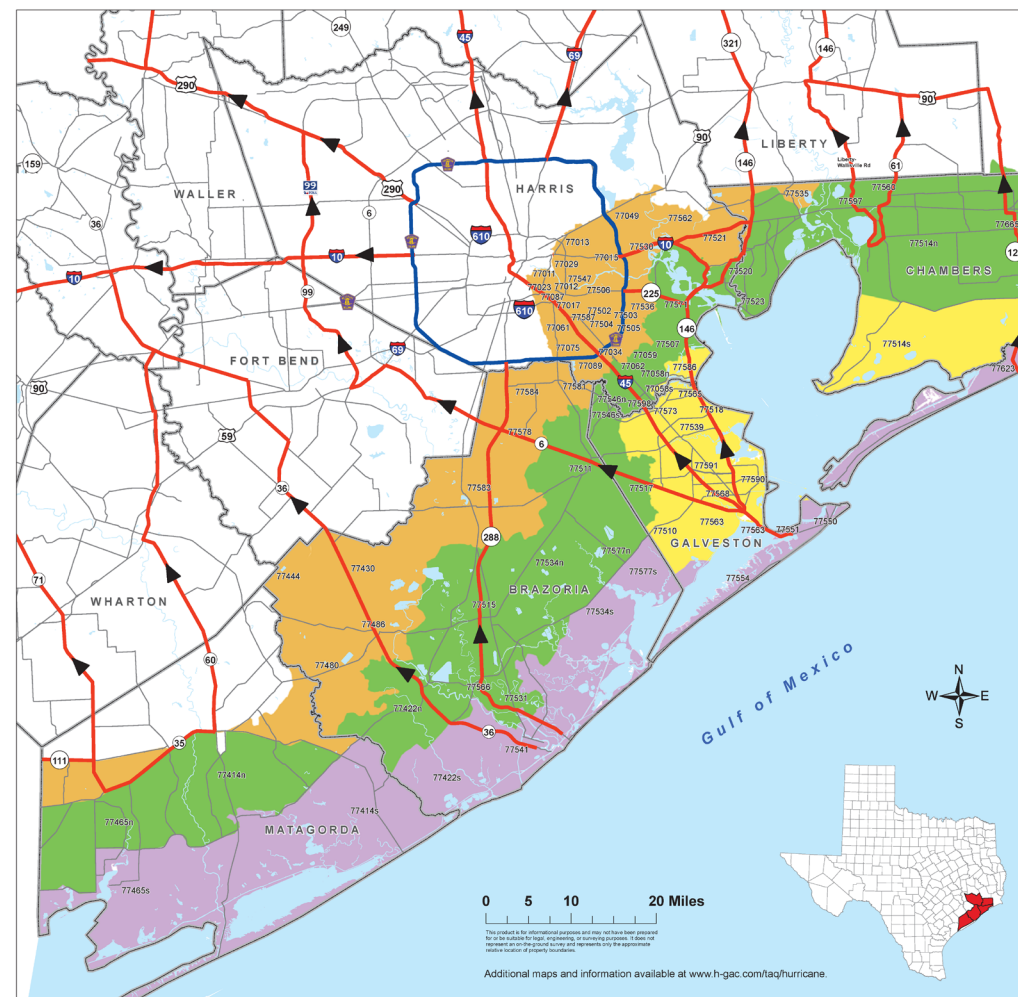

STAY INFORMED

If you live in a low-lying, flood-prone area, you may be mandated to leave, because heightened seas and tides can affect your home.

If you live in a mobile home in any evacuation zone, plan to evacuate anytime a hurricane threatens. Powerful winds are capable of destroying mobile homes.

If you are traveling with young children, elderly family members or people with functional access needs, you should leave early. Waiting for a general evacuation can put their health at risk and lengthen your travel time.

EVACUATION ZONES

Zip codes have been provided to help you determine what evacuation zone, if any, you live in.

Evacuation zones will be announced in time to evacuate. You should leave when your evacuation zone is announced.

Zip code evacuations allow the residents in the greatest danger, the opportunity to leave first.

EVACUATION TIPS

- ▶ If you evacuate, take your disaster supply kit with you.
- ▶ During hurricane season (June 1 – November 30), keep at least half a tank of gas in your car at all times.
- ▶ Rethink your needs every year and update your kit as your household changes.
- ▶ To learn how you can be a part of an improved evacuation, please visit www.readyharris.org
